- ▶ Top contact heat level
- ▶ Best possible dexterity
- ▶ Low risk of cuts
- ▶ Very low afterflame/afterglow time
- ▶ No further tearing of notches
- ▶ Silicone coating for secure grip
- ▶ With hook

Description

Now, it doesn't matter when things start to get hot: These high-quality BBQ gloves have heat resistance of up to 500°C. The material and quality also offer protection against everyday kitchen hazards such as cuts, and the gloves have a very low smoulder time. They are comfortable to wear and the firm grip and high dexterity they offer optimise work processes.
