

Water Filter KV-150

Description

A range of advantages thanks to the use of the Water Filter KV-150: The filtering of the drinking water reduces limescale and significantly increases the lifetime of the coffee maker, resulting in a reduction in service costs. Since the aroma and crema are optimised, it takes enjoyment of each cup of coffee to a new level.

Features

- Water intake temperature: 4 °C to 30 °C
- Properties:
