Technical specifications

Name	Thermo jug 1,5L
Code-No.:	190121
Material:	Thermo jug: stainless steel; lid, pouring mechanism and handle: black plastic
Capacity:	1.5 litres
Dimensions:	W 165 x D 140 x H 215 mm
Weight:	0.69 kg

Information and tips

NOTE!

Wash the thermo jug prior to every use with hot water and a gentle cleaning substance. After washing, rinse several times with clean water.

- Fill the thermo jug as desired with a hot or cold beverage.
- Place the lid on the thermo jug and turn it clockwise to close.
- To pour, tilt the thermo jug and press the button on the lid. Fill a coffee cup or glass with the desired amount of beverage.
- Close the pouring mechanism by releasing the button.
- For the beverage contained in the thermo jug to hold its temperature as long as possible, either heat or cool the thermo jug for hot or cold beverages respectively. To do so, rinse the inside of the thermo jug with hot or cold water, or leave such water inside for a few minutes before filling the thermo jug with the desired beverage to ensure best results.
- Do not fill the thermo jug with fizzy drinks, dairy products or baby formula, as bacteria may form and multiply inside the thermo jug.
- Before pouring water or tea into a thermo jug that previously had coffee inside, wash it thoroughly to remove any coffee taste.

Cleaning

- Remove the thermo jug lid for washing by turning it counter-clockwise. Wash the lid in warm water with a gentle cleaning substance.
- Wash the inside of the thermo jug after each use with warm water and a gentle cleaning substance.
- Hard water can leave white mineral deposits inside the thermo jug. Coffee will stain these deposits and make them brown. To remove such deposits, we recommend using commercially available cleaning substances.
- Rinse the thermo jug **several times** with clean water.
- Wipe the exterior of the thermo jug with a soft, moist cloth.
- **Never** place the thermo pump jug in a dishwasher.
- **Never** place the thermo pump jug in water.
- **Never use** abrasive cleaning agents.
- Use only soft cloths and **never** use sharp cleaning tools that may damage the stainless steel thermo jug surface.
- After washing the thermo jug, leave it open as long as necessary for it to dry prior to further use.
