Technical data

Name	Thermo pump jug 1,9L-ST
Code- No.:	190117
Material:	Stainless steel, plastic
Colour:	Silver, black
Model:	<ul style="list-style-type: none"> ▪ Designed for hot drinks ▪ Pump system ▪ Pump lid lock ▪ Double-walled ▪ Carrying handle ▪ Glasses / cup height max.: 225 mm ▪ Temperature loss / hour approx.: 2.3 °C
Capacity:	1.9 litres
Dimensions:	W 150 x D 200 x H 390 mm
Diameter surface:	150 mm
Weight:	1.3 kg

We reserve the right to implement the technical modifications!

Product is suitable for:

- Coffee Machine "Aurora 22" (Code-No.: 190048)
- Coffee Station 1190 (Code-No.: 190153)
- Coffee Station 2190 (Code-No.: 190154)

Features:

- well-isolated double-walled casing;
- precise dosing thanks to the easy to use pump system;
- easy to use;
- safe transport due to a fold-in carrying handle;

- base with an integrated ring for 360° rotation of the flask with pump system

- fully removable pump head to make cleaning easy;
- open the pump lid and press on the catch located in the middle of the lid fixing and simultaneously lift the pump lid up.

Instructions and advice

- Before each use, thoroughly clean the thermo pump jug with water and mild cleaning agent. After cleaning, rinse the thermo pump jug with clean water several times.
- Filling the thermo jug is easy. Open the pump lid by pressing the buttons on the pump head and lift the pump lid up.
- Remove the pump tube from the thermo jug and fill it with hot beverage.
- Replace the pump tube and close the pump lid until the buttons click into place.

- To pour drinks from the thermo pump jug, pull the pump lid up until it clicks.

- Next, press the pump lid (see figure at the right) to start the pump mechanism. Press the lever as many times as required to fill in the container (cup, glass) with the desired amount of beverage.

- To maintain the required temperature of the beverage inside the thermo jug, it is recommended to pre-heat the thermo pump jug. Rinse the inside of the thermo pump jug with hot water or leave the water inside the thermo jug for some time before filling it with the required beverage. This helps achieving the optimum efficiency of the thermo pump jug.
- Do not fill the thermo pump jug with fizzy drinks, dairy products or baby formula, as bacteria may grow inside the thermo jug.
- Before pouring water or tea into the thermo pump jug that previously held coffee, clean the thermo pump jug thoroughly to remove the coffee taste.

Cleaning

- Clean the thermo pump jug after each use.
- **Never use** aggressive cleaning agents.
- **Never use** cleaning agents that may scratch the surface of the thermo pump jug.
- Use only a soft cloth for cleaning.
- **Never place** the thermo pump jug in a dishwasher.
- **Never place** the thermo pump jug in water.
- Open the pump lid of the thermo pump jug and remove the pump tube. Pour out the contents of the thermo pump jug.
- To make cleaning easier, remove the pump lid of the thermo pump jug. Follow the tips presented in section “**Features**“.
- Clean the thermo pump jug, pump tube and pump lid with warm water and mild cleaning agent. Thoroughly rinse the cleaned parts with clean water.
- Wipe the outside of the thermo pump jug with a soft, moist cloth.
- Hard water may leave calcium deposits inside the thermo pump jug. Coffee usually colour the deposits and leave the brownish deposit. In order to remove the deposits use a cleaning agent available on the market. Observe the instructions of the manufacturer of such a cleaning agent. Finally, rinse the thermo pump jug several time with clean water.
- After cleaning, leave the thermo pump jug open to dry and store until further use.
