

## Kitchen rail 700-1200

### Description

Fitting appliances in the 700 series with a kitchen rail gives them a stylish accessory as well as optimising safety and functionality. The placement of the rail further away from the appliance effectively reduces the risk of burns from high-temperature zones. In addition, the robust design allows for the convenient storage of pots, pans and plates while they're waiting to be used.

### Features

- Material: Stainless steel
- Load-bearing capacity max.: 15 kg
